# INTRODUCTION

Exubere Trades specializes in contract farming of bamboo, offering a unique opportunity for farmers to cultivate bamboo under a secure and profitable framework. By providing a buy-back certificate, Exubere ensures a guaranteed market and fair price for the harvested bamboo. This innovative approach not only supports sustainable agriculture but also empowers farmers with financial stability and reduces the risk associated with traditional farming methods. Through Exubere's comprehensive support system, including training, resources, and a reliable market, farmers can confidently invest in bamboo farming, contributing to environmental conservation and economic growth.

# PROJECT OVERVIEW

01

**Farmer Investment** :The investment made by the farmer for this project is **Rs. 75,000.**

**Saplings Purchased** : The farmer has purchased **1,000 saplings** to be planted.

02

03

**Harvest Period** : The harvest period for the project is planned to be **5 years.**

 **Expected Yield** :It is expected that each sapling will produce **10 clumps** (bamboo stems) over the harvest period.

04

## SITE SELECTION & PREPARATION

## CLEANING THE AREA

- ✔ Begin by removing any undesired shrubs, grasses, or other plants from the area.
- ✔ Clearing the area is essential to facilitate effective inter-cropping and to ensure the bamboo saplings have the best possible conditions for growth.

FARMING**

# SITE SELECTION AND PREPARATION

## PIT PREPARATION

- ✓ The size of the pits varies based on rainfall:
  - High Rainfall Areas: Pits are 60 x 60 cm.
  - Low Rainfall Areas: Pits can be up to 1 meter in diameter to create micro-catchments.
  - Properly Rooted Seedlings: Smaller pits of 30 x 30 cm.
  
- ✓ The pits should be deep and wide enough to allow the bamboo to establish roots quickly.

# SITE SELECTION AND PREPARATION

## PLANTING ARRANGEMENT

- ✓ **Spacing:** Saplings should be planted **10 x 4 feet** apart.
- ✓ **Land Utilization:** This spacing allows for the cultivation of **1,000 plants per acre**.
- ✓ **Planting Method:**
  - Place the offset 10 to 20 cm below the surface.
  - Cover the offset with soil and press the soil slightly around the seedling to secure it.

## EXPECTED OUTCOMES

### *Growth Period*

Bamboo plants will take approximately **5 years** to reach full maturity.

Each bamboo sapling is expected to produce **10 clums**, making it a highly productive investment.

### *Yield*

PARTNER WITH US :-

**BAMBOO CONTRACT  
FARMING**

## FINANCIAL ANALYSIS

### **Initial Investment**

Rs. 75,000 for purchasing 1,000 bamboo saplings.

**Land Requirement:** 1 acre of land.

### **Harvest Potential**

After 5 years, 1,000 saplings yielding 10 clums each will result in 10,000 clums.

### **Market Value**

The market value of bamboo clums will determine the final profitability, which is expected to be substantial given the multiple uses of bamboo in construction, furniture, and other industries.

# CONCLUSION

The bamboo contract farming initiative by Exubere Trades offers farmers a promising opportunity for sustainable and profitable agriculture. With a relatively low initial investment and the potential for high yields, this project supports both economic growth and environmental sustainability.

Exubere Trades is committed to providing continuous support to farmers throughout the process, ensuring optimal growth conditions and maximizing the yield from each planting cycle.
